

December 2016 Puck Sirius

Eight highlighted clues, each lacking further definition, reveal seven likely contents of the eighth. Four examples of one of the seven appear as clues, which need to be solved accordingly.

Asterisked clues each lead to a solution that must be modified before grid entry, so the solver is invited to do what two party members might do thematically. Inevitably this will involve the novelty of some *fantastic* rough and tumble! Letter counts are given for (solution;grid entry) in each case.

Clues are listed in alphabetical order of their solutions.
